

BOROSOL® 10

www.lovelandproducts.ca

BOROSOL® 10 (10% boron) is a patented soluble polyborate liquid for the prevention and correction of boron deficiencies in crops. **BOROSOL 10** is a superior formulation with increased plant uptake vs other boric acid products.

Product Benefits:

- Plants take up the boron more rapidly and completely (poly borate vs boric acid)
- Convenient liquid – easy to pour, measure and handle
- Flexible and compatible – foliar or soil uses
- Mixes well with other products
- BOROSOL 10 has a pH of 8.0
- Transports sugars through cell membranes
- Boron is involved with plant's utilization of nitrogen and phosphate
- Required for germination of pollen grains, flowering and reproduction, and seed formation
- Reduces yield loss from boron deficiencies
