Dichlorvos or 2,2-dichlorovinyl dimethyl phosphate is a organophosphate, widely used as an insecticide.

Product Benefits:

- Group 1B insecticide
- Emulsified concentrate which can be mixed with water for use as a surface spray to control aphids and whiteflies on greenhouse grown ornamentals, cucumbers and tomatoes
- Also used to control flies, gnats, mosquitoes, cockroaches, fleas, sowbugs, bees, wasps, hornets and yellow jackets outside of the greenhouse
