RISER® is the product to address crops phosphorus (P) demands throughout the season and ensuring reduced yield loss due to phosphorus deficiency. **RISER** is an easy to use, low salt, high phosphorus fertilizer with a complete micronutrient package. **RISER** is formulated with zinc ammonia acetate, improving nutrient utilization when applied in furrow and contributing energy for photosynthesis when applied foliar.

Product Benefits:

- Increased availability of soil nutrients
- Contains Cu, Fe, Mn & Zn nutrients essential for the photosynthetic process
- Seed safe formulation that can be applied in-furrow
- More acres per fill for the grower vs traditional liquid phosphorus products
- Powered by zinc ammonium acetate technology
- Full micro package
- Low salt formulation (13.5)
- Low use rate
