SUPER SPREADER is a non-ionic surfactant used to improve the performance of certain pesticides. **SUPER SPREADER** provides improved foliage wettability through the formation of a continuous and uniform spray-solution film on the leaf surface. **SUPER SPREADER** enhances the effectiveness of agricultural and non-crop pesticides.

Product Benefits:

- With glycol as the co-solvent helps maintain leaf wetness resulting in better uptake of the active ingredient
- Has less atomization and less evaporation than alcohol based surfactants
