TERRAMAR® is a proprietary bio-extraction of seaweed and leonardite, designed to increase nutrient uptake and chelation. By delivering unique metabolic compounds, TERRAMAR enhances microbial activity in the rhizosphere and improves plant response to stressful conditions.

Product Benefits:

- Improves nutrient use efficiency of applied fertilizer and existing soil fertility
- Helps to improve crop tolerance to abiotic stressors such as heat, drought, salt and cold, which can represent significant yield-limiting factors
- Flexible formulation allows for applications throughout the season to address crop needs
